1st June New Practice building update

The constructors have provided us with an update on how the new practice is developing; pictures are available to view on the front page slideshow.

‘The site offices have now been installed, connected and are in full operation. Works on the site during this period has seen the completion of the piling works, the integrity tests for each pile has been completed, with the exception of four remaining piles due to be completed on May 23rd 2017 once the works have commenced on the lift pit, 50% of the excavated sub soil has been removed from site and an expected further 25% removed over the next few weeks. Building control has visited the site to inspect the ground beams during installation. All ground beam have been installed and cast on May 16th 2017, sub structure masonry works are underway and are due to be completed by May 25th 2017. All SVP (soil vent pipe) installations within the building are due to complete by May 26th 2017. The external drainage works have started and we expect completion of this within the next 5-weeks. A CCTV surgery of the existing foul drainage and storm water is due to take place by June 1st 2017. In the next month the start of the ground floor plank installation to the practice and pharmacy will commence and the FW (foul waste) drainage and the formation of block work to DPC (damp proofing course).’

Look out for more updates of the new surgery on our website with photos and updates from the construction team.
